Building Reports, Dashboards and Custom Pages (UI Builder) for the Application

Low-Code Lab | Application: GYM MEMBERSHIP (Zoho Creator, Development environment)

Name: Roshan S

Register No: 241501170

Department: AIML, Rajalakshmi Engineering College

Abstract

This experiment extends the Membership Enrollment Form built earlier by adding reporting and visualisation layers in Zoho Creator. Two reports (Upcoming Starts Report and Members By Plan) were created from the form data, and a Gym Membership Dashboard was designed in the UI Builder using a Panel heading, a Board, a pie chart and a column chart. The outputs let the front desk and manager see member counts by plan, type and workout interest at a glance.

1. Aim

To build reports, a dashboard and UI elements in Zoho Creator that summarise the gym membership enrollment records for front-desk and manager use.

2. Reports Created

2.1 Upcoming Starts Report. A list report on the Membership Enrollment Form that shows all enrollment records with quick filters on Membership Plan and Preferred Start Date, so staff can narrow members by plan or by the day they begin. The live view shows all 5 sample records (Showing 5 of 5).

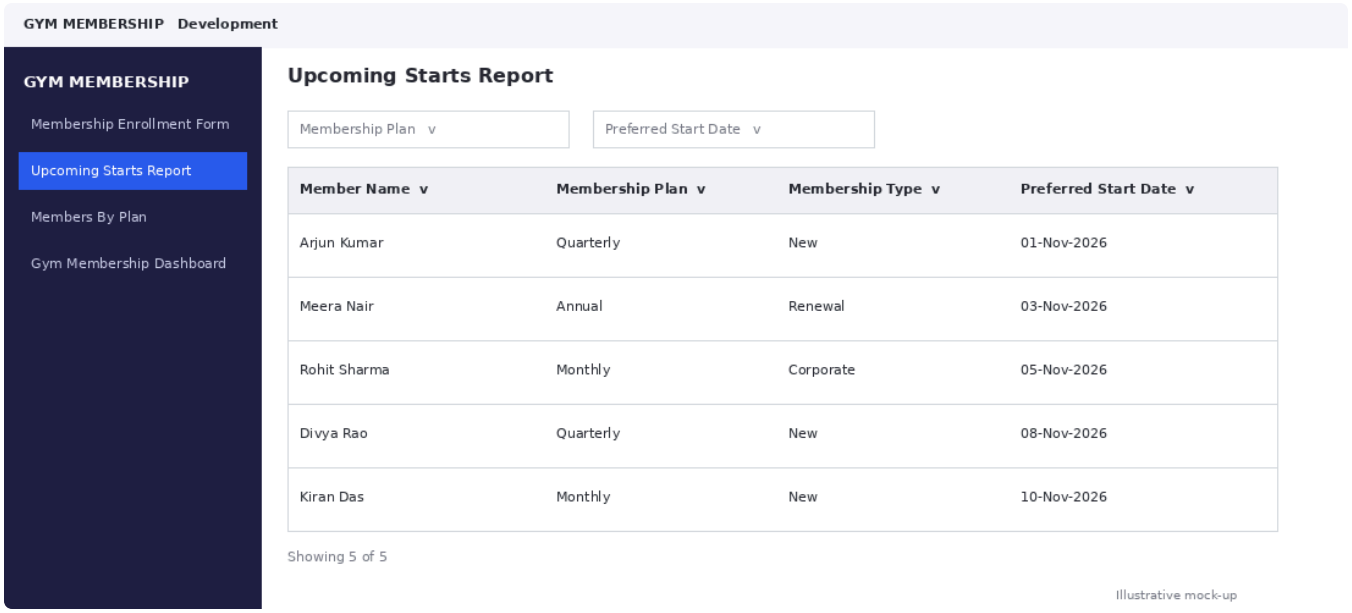

Figure 1: Upcoming Starts Report (live view) with Membership Plan and Preferred Start Date filters

2.2 Members By Plan. A second report on the same form that lists the enrollment records with the plan, type and workout interests of each member, used as the plan view of the data.

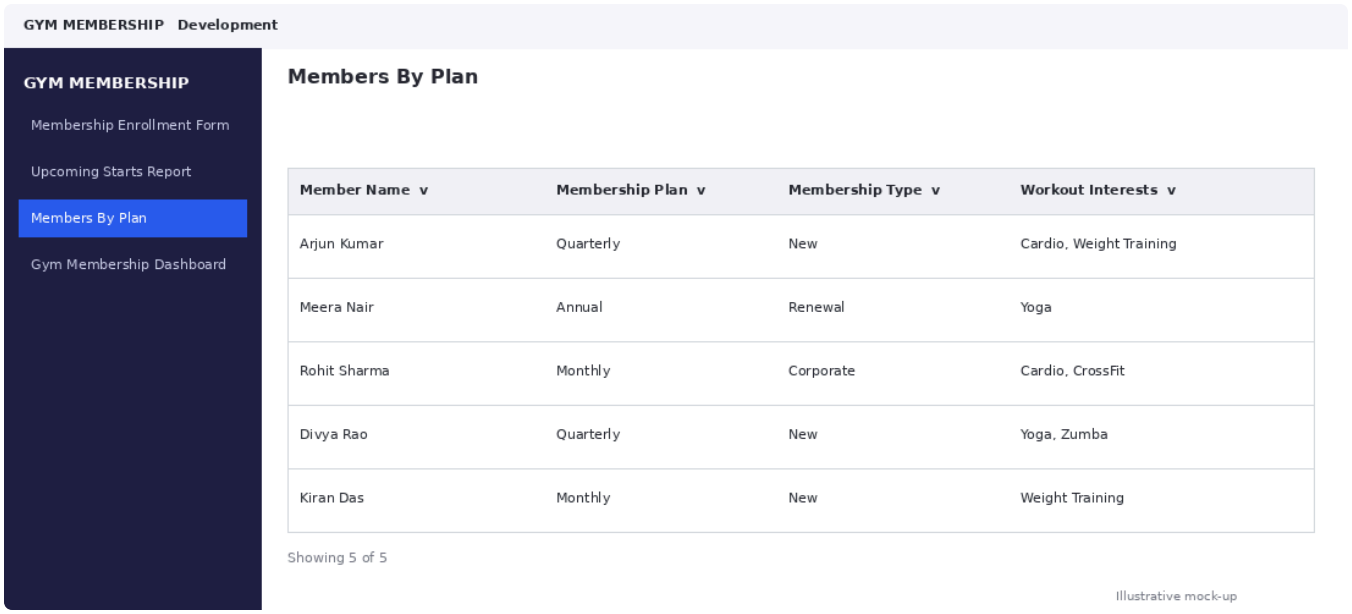

Figure 2: Members By Plan report (live view)

3. Dashboard Design (UI Builder)

The Gym Membership Dashboard was built in the Design tab of the UI Builder. A Panel element holds the heading "GYM MEMBERSHIP DASHBOARD", a Board element shows member counts grouped by Membership Plan, and two Chart elements show a pie chart and a column chart. In the builder the Board displays placeholders (Ct ()) which are replaced by real counts at run time.

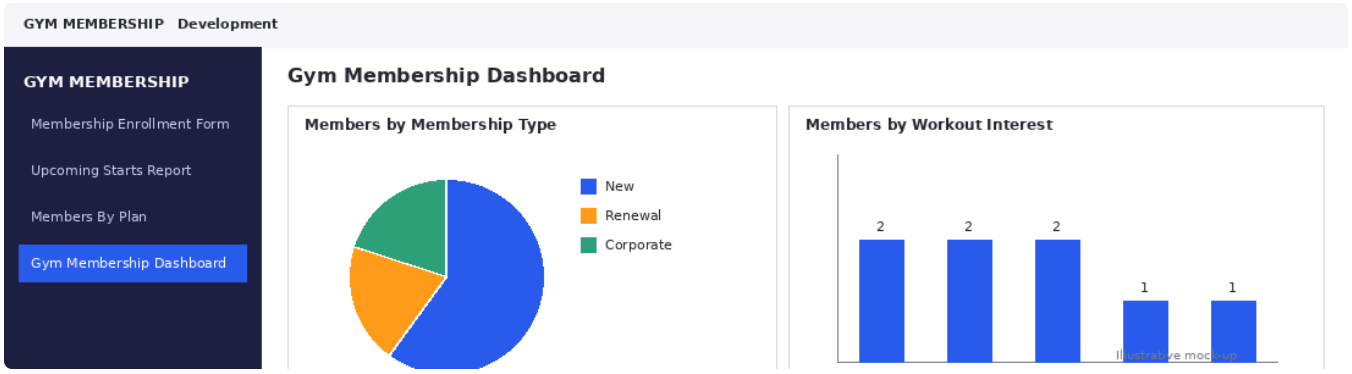

Figure 5: Dashboard builder: pie chart and column chart (lower half)

4. Live Dashboard Output

In the live view the Board shows Monthly: 2, Quarterly: 2 and Annual: 1 members. The pie chart plots Members by Membership Type; hovering over the New slice shows 3 members, with 1 Renewal and 1 Corporate. The column chart shows Members by Workout Interest, with 2 members each for Cardio, Weight Training and Yoga, and 1 each for CrossFit and Zumba.

5. Result

Reports and a multi-element dashboard were created in the GYM MEMBERSHIP application and verified in the live Development view. Member counts by plan, type and workout interest are displayed from the five submitted records.

6. Learning Outcome

Learnt how to create list reports with quick filters, and how to use the UI Builder to compose a dashboard from Panel, Board and Chart elements that read live data from a form. This shows how raw form submissions are turned into information the gym manager and front desk can act on.
