## Abstract

This experiment designs the data model and form for a Gym Membership Enrollment application in Zoho Creator. A form named Membership Enrollment Form was built using the thirteen basic field types, grouped into four sections, and a report was created to list the submitted membership enrollments. Field validations were applied and the form was tested by submitting sample enrollments. The same form is the base for the Gym Membership Reports Suite, in which nine reports are built on its data.

## 1. Aim

To design a Membership Enrollment Form in Zoho Creator using the basic field types, apply field validations, and view the submitted enrollments in a report.

## 2. Introduction

A gym that takes enrollments through phone calls, walk-ins and messages has no structured record of its members until they arrive. A single online form solves this by collecting the member details, plan preferences and start schedule in a fixed format. In Zoho Creator, each field on a form becomes a column of the data table, so designing the form is the same as designing the data model of the application.

The form in this experiment is the base form of the Gym Membership Enrollment & Front Desk Management application. Later, the Gym Membership Reports Suite builds nine reports (List, Spreadsheet, Kanban, Calendar, Map, Timeline, Pivot, Chart and Summary) on top of the data it captures, so choosing the right field types here decides what those reports can group, sort and plot.

The form uses the thirteen basic fields: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select and Checkbox.

## 3. Form Design

The fields are organized into four sections so that the form is easy for a new member to follow.

| Section | Field Name | Field Type | Purpose |
|---|---|---|---|
| A. Member Details | Member Name | Name | Full name of the member (first and last name) |
| | ID Proof Number | Single Line | Identification document number |
| | Age | Number | Age of the member in years |
| B. Contact Details | Email Address | Email | Email for the enrollment confirmation |
| | Contact Number | Phone | Mobile number with country code |
| | Residential Address | Address | Home address, used later for the Map View |
| C. Plan and Fitness Preferences | Membership Plan | Drop Down | Choose one plan: Monthly, Quarterly, Half-Yearly or Annual |
| | Membership Type | Radio | New, Renewal or Corporate |
| | Workout Interests | Multi Select | One or more of Cardio, Weight Training, Yoga, Zumba, CrossFit |
| | Health Notes | Multi Line | Free-text remarks for the trainer |
| D. Scheduling and Policy | Preferred Start Date | Date | Intended first day, used later for the Calendar View |
| | Preferred Workout Time | Time | Expected workout slot |
| | Agree To Gym Policies | Checkbox | Acknowledgement of gym rules and fee terms |

## 4. Procedure

**Step 1: Create the form and add fields.** Inside the Gym Membership Enrollment & Front Desk Management application, a new form named Membership Enrollment Form was created. The fields were dragged from the Basic Fields palette onto the form, and sections

were used to group them. Figure 1 shows the Member Details and Contact Details sections, and Figure 2 shows the Plan and Fitness Preferences and Scheduling and Policy sections.

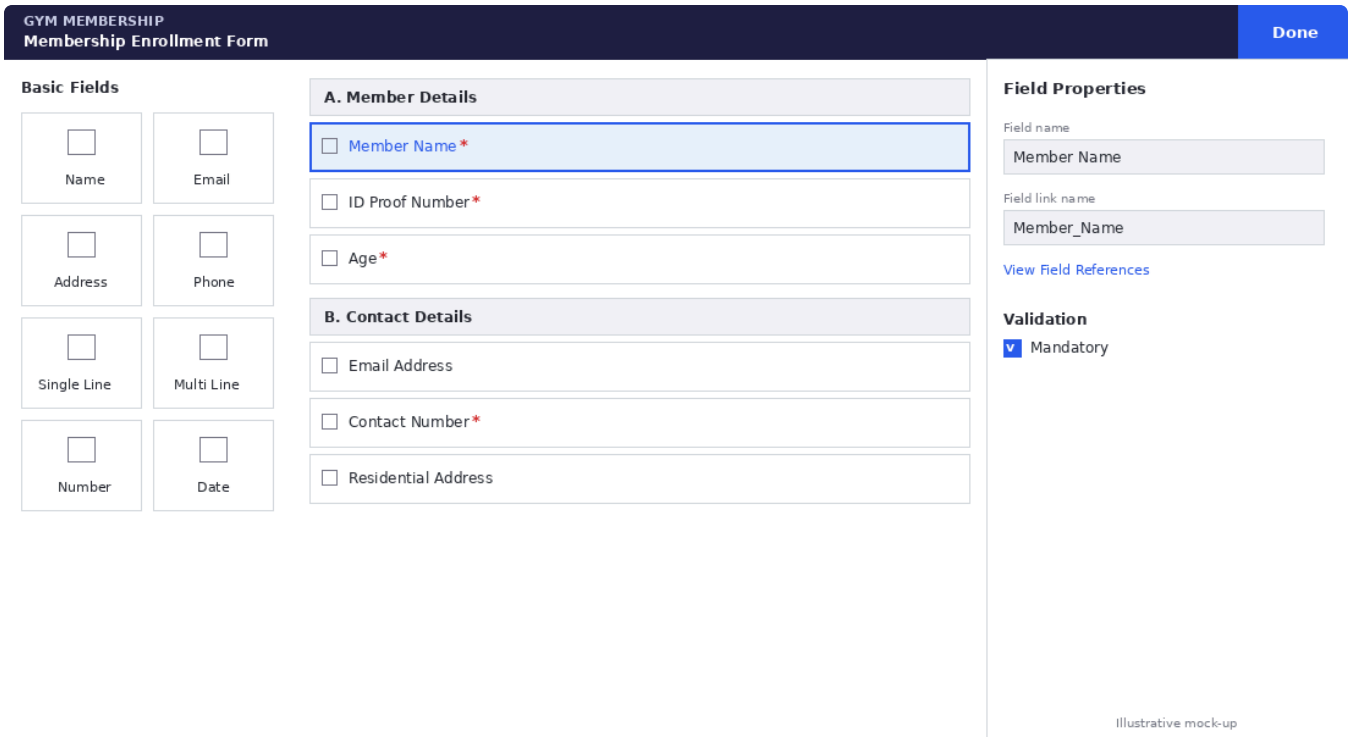

*Figure 1: Form Builder: Member Details and Contact Details sections*

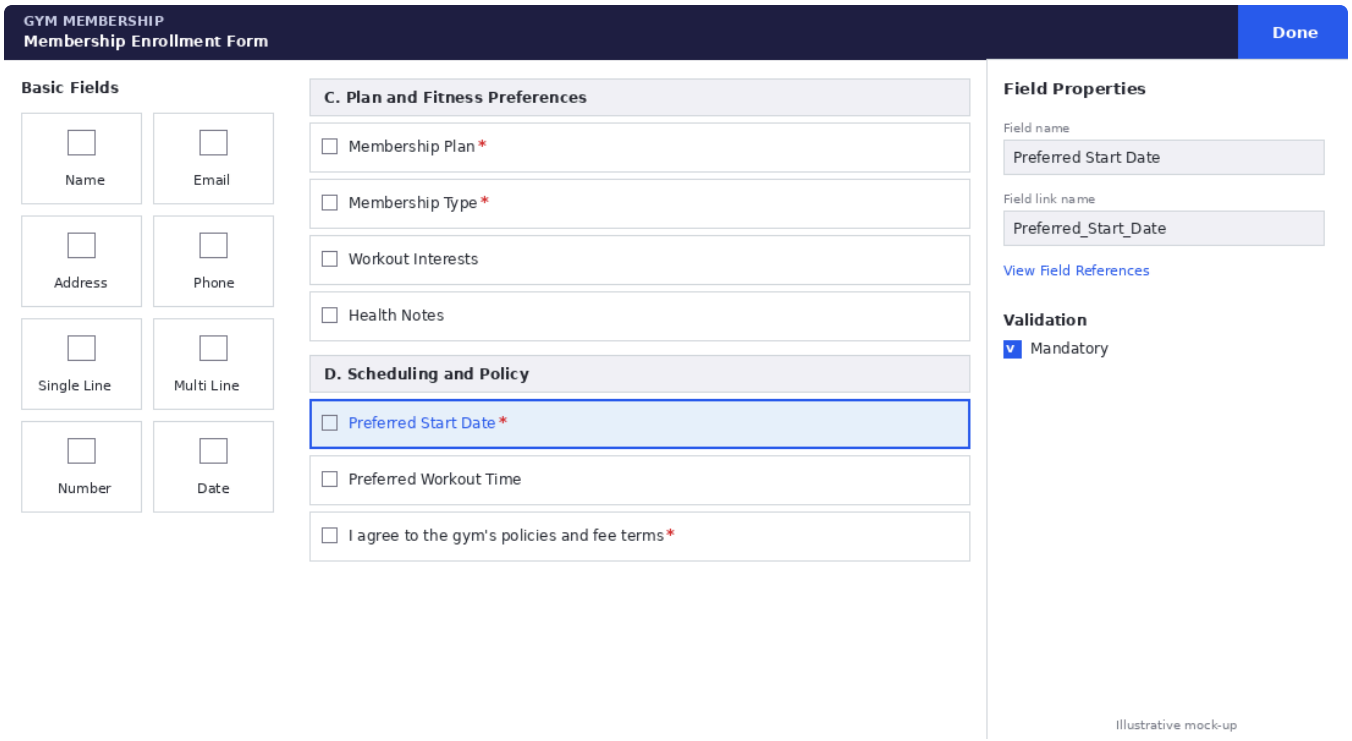

*Figure 2: Form Builder: Plan and Fitness Preferences and Scheduling and Policy sections*

**Step 2: Set field properties and validations.** For each field, the field name and link name were checked in the Field Properties panel, and the *Mandatory* option was ticked for the required fields. Required fields are marked with a red asterisk on the form. Figure 3 shows the properties of the Age field.

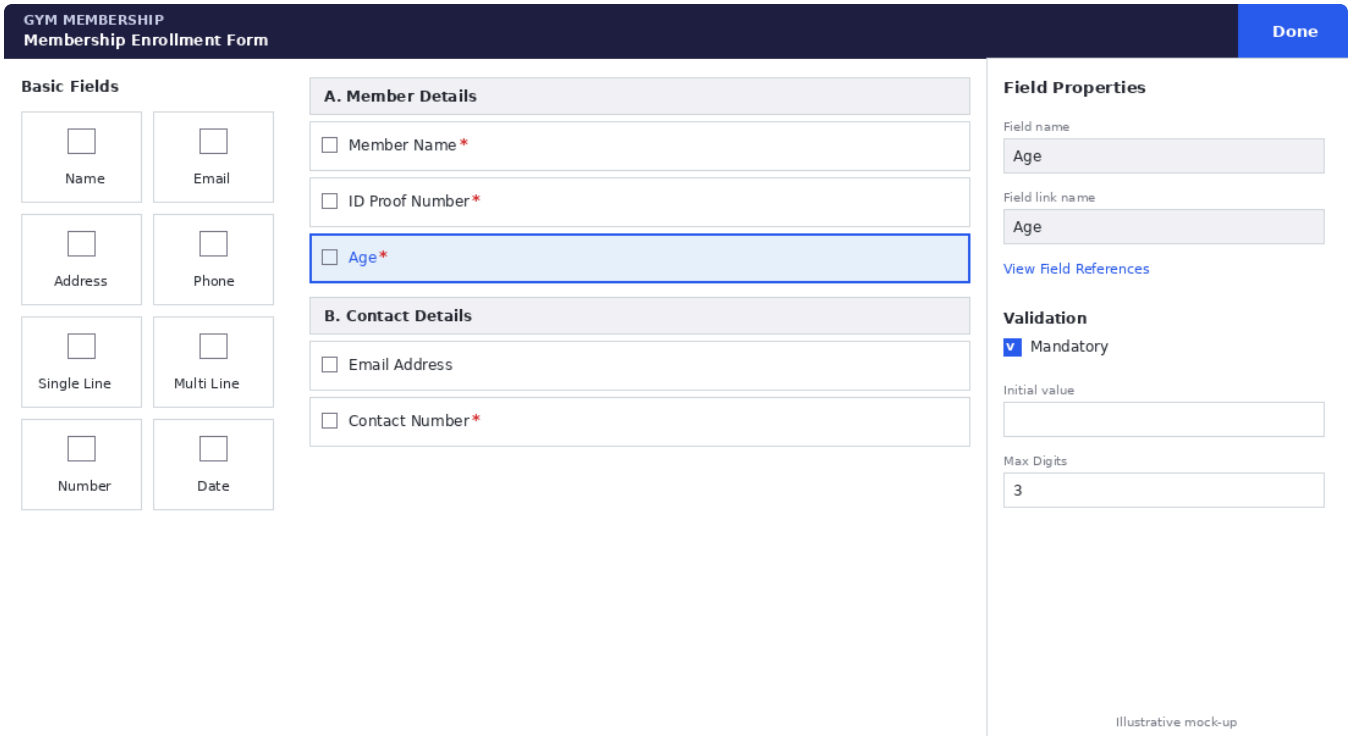

*Figure 3: Field Properties of the Age field*

**Step 3: Preview the form.** The form was opened using Access Development Live. The Contact Number field shows the India (+91) country code format (Figure 4).

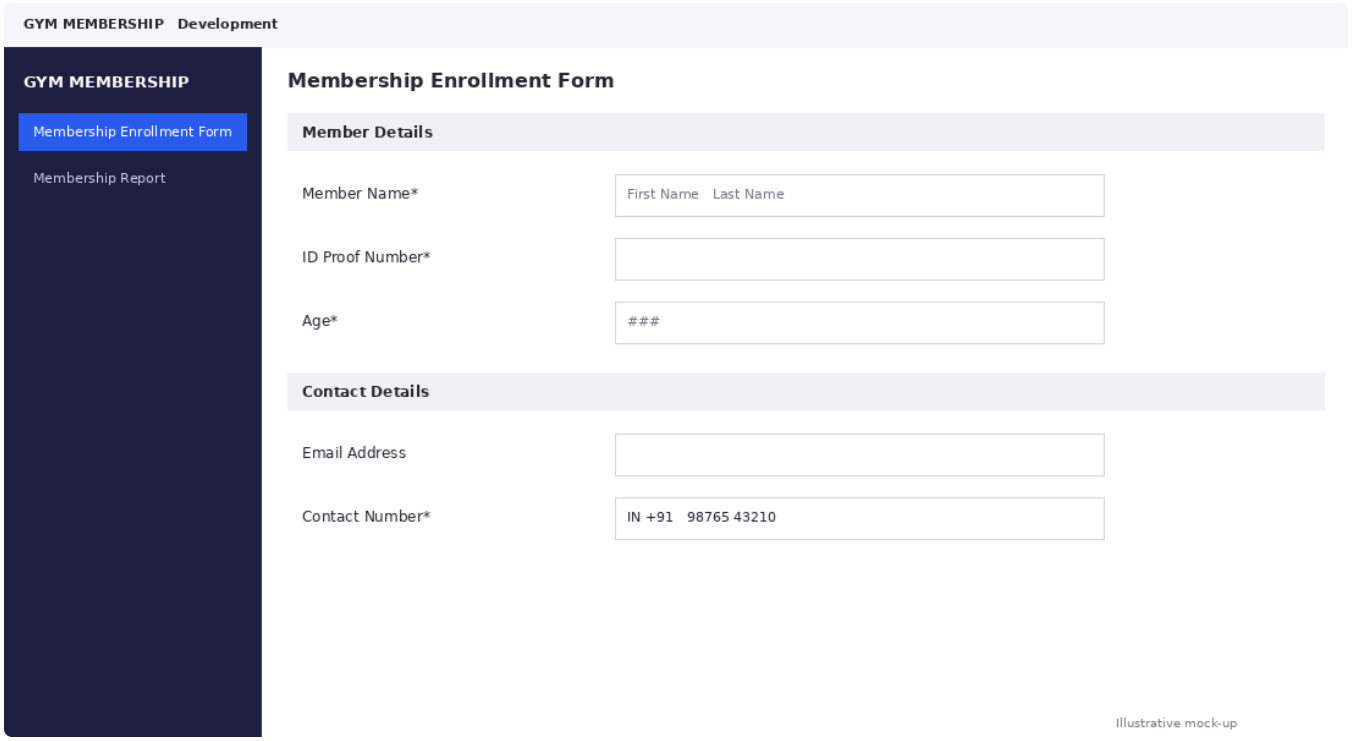

*Figure 4: Live form opened in the browser*

**Step 4: Test the validation.** The form was submitted with required fields left empty. Zoho Creator blocked the submission, showed the message *Invalid entries found*, and marked the empty fields with the message *This field is mandatory. Enter a value.* (Figure 5).

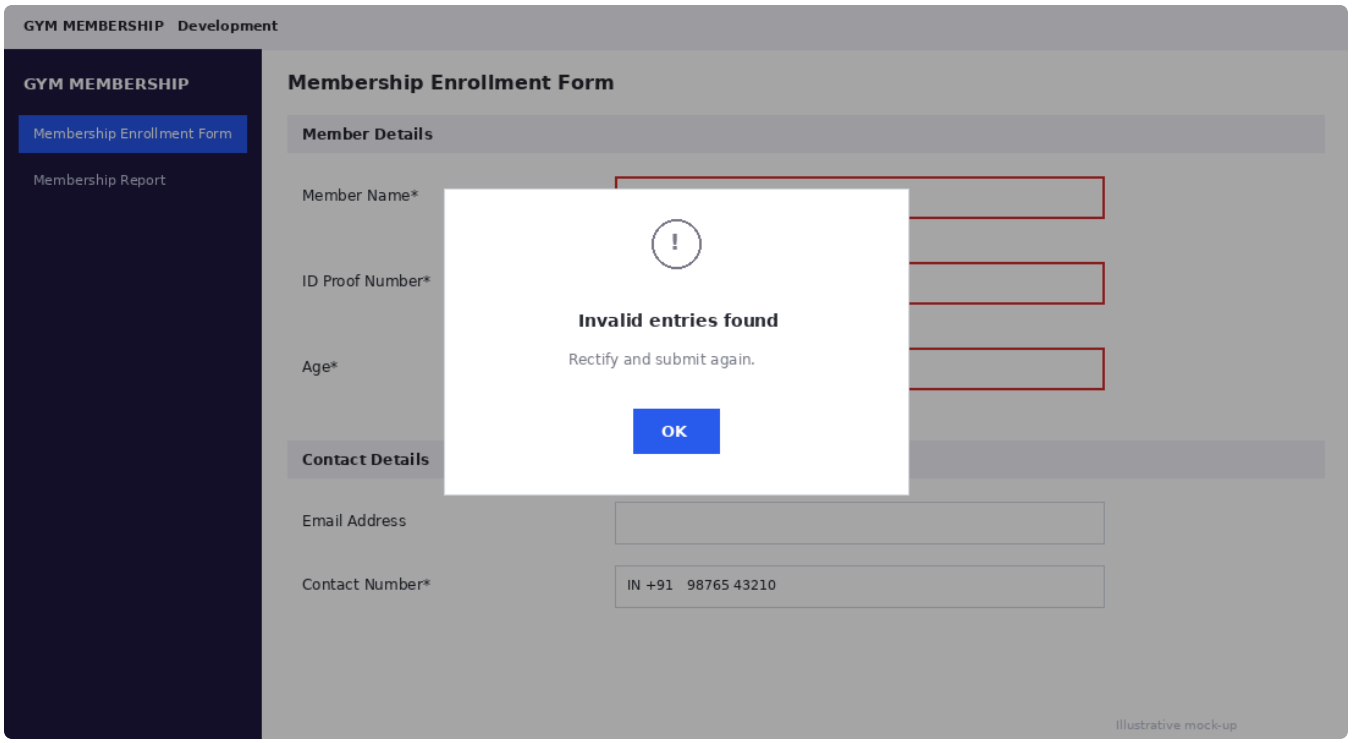

*Figure 5: Mandatory field validation message on submit*

**Step 5: Submit sample enrollments and view the report.** Three sample membership enrollments were submitted. The report named Membership Report lists each submission as a row, with one column for each form field (Figures 6 and 7).

| Member Name | ID Proof Number | Age | Email Address | Contact Number |
|---|---|---|---|---|
| Arjun Kumar | ID-1001 | 26 | arjun.k@example.com | +919876500001 |
| Meera Nair | ID-1002 | 31 | meera.n@example.com | +919876500002 |
| Rohit Sharma | ID-1003 | 22 | rohit.s@example.com | +919876500003 |

Illustrative mock-up

*Figure 6: Membership Report: member and contact columns*

| Contact Number | Residential Address | Membership Plan | Membership Type | Preferred Start Date |
|---|---|---|---|---|
| +919876500001 | 12, Sample Street, Anna Nagar, Chennai, Tamil Nadu, 600040 | Quarterly | New | 01-Nov-2026 |
| +919876500002 | 45, Sample Road, Velachery, Chennai, Tamil Nadu, 600042 | Annual | Renewal | 03-Nov-2026 |
| +919876500003 | 8, Sample Avenue, Adyar, Chennai, Tamil Nadu, 600020 | Monthly | Corporate | 05-Nov-2026 |

Illustrative mock-up

# 5. Validations Applied

| Field | Validation |
|---|---|
| Member Name, ID Proof Number, Age, Contact Number | Mandatory |
| Membership Plan, Membership Type, Preferred Start Date | Mandatory, because the reports suite groups and plots by these fields |
| Agree To Gym Policies | Mandatory, so the form cannot be submitted unless it is ticked |

| Field | Validation |
| --- | --- |
| Email Address | Built-in email format check of the Email field type |
| Contact Number | Phone field with the India (+91) country code |

## 6. Result

The Membership Enrollment Form was built with the basic field types, tested with sample data, and the submitted enrollments appear in the Membership Report.

## 7. Conclusion

A form in Zoho Creator is both the data entry screen and the data model of the application. Choosing the right field type for each piece of information gives built-in validation and a clean report with no extra coding. For the gym application, fields such as Membership Plan (Drop Down), Membership Type (Radio), Preferred Start Date (Date) and Residential Address (Address) are what later allow the Kanban, Calendar, Map, Pivot and Chart reports to work.
